Full STEAM Ahead is an intensive, two-week program for Peak Education scholars held at The Colorado Springs School. The program delivers a robust Science, Technology, Engineering, Arts and Math (STEAM) curriculum to rising 7th through 9th graders.

For two weeks in July, students discover learning in whole new ways through immersion in topics and studies not typically afforded to them during the regular school year. From dissecting sheep’s brains and programming robots to practicing the design thinking process while inventing their own products, students fully engage in learning through exciting classroom experiences, field trips and electives. While priority is given to incoming Peak Education scholars, all students who will be entering 7th, 8th or 9th grade in the fall are invited, and students are encouraged to return for multiple summers if space allows.

Lunch and transportation from several of Peak Education’s partner schools is provided.

Contact Peak Education for more information and to request an application.
